Crafted Quality

For over a decade we have produced architectural quality concrete details at our workshop in Richmond BC, Canada. We have defined our craft - creating our trademark look with unique textures that take skill, expertise and patience.

Concrete is a timeless material and demands no compromises in its process to ensure performance in rigorous outdoor conditions. It is this meticulous approach that has guided our development of these fire pits in their integrity of design. We are proud that they embody the finest in craftsmanship, and it is our hope that you will find the style that is just right for your space.

WE WELCOME YOU TO JOIN OUR FAMILY BY THE FIRE.

Custom Fire Pits Process

1. Our team works with you or your trade professional to review design drawings for scale and fit.
2. We suggest the right heat and burner combinations to meet site requirements.
3. Drawings are prepared for sign off prior to fabrication to ensure everyone is on the same page.
4. Samples are available to see the colours in your specific space.

Artisan Hand-Made

All DreamCast fire pits are proudly hand-cast and individually finished using the best raw materials to create high performance concrete that is designed to perform in demanding environments.

Every fire pit is made to its best, for the best.

Ignition systems

All DreamCast fire pits are available in a variety of ignitions to meet different site conditions and clearance requirements.

Pilot Systems are our standard high heat output ignition with a safety flame monitoring device without electricity or batteries offering heat up to 250k BTU.

Low clearance systems offer great burner system options with overhead combustible clearances up to 84"-perfect. These are available in battery operated piezo, manual, and electronic ignition.

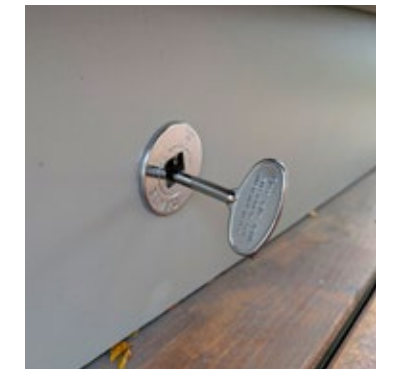

Manual Systems are available for burner systems that are maximum 65K BTU offering a simple match lit start and a turn-key ignition.

Electronic ignition systems are available for low clearance and high heat output burners to remotely start the fire pit. Some models are compatible with home automation systems and mobile phone apps.

ETL mark

The ETL certification mark means our gas fire pits are certified by Intertek Laboratories

YOUR PIECE OF MIND IS OUR PRIORITY AND COMMITMENT.

Safety Certified

- ✓ Testing a full appliance goes beyond just a day at the lab.
- ✓ All components of a system must meet strict standards for quality and performance.
- ✓ Each fire pit system has been rigorously tested in all weather conditions from severe winds to heavy rain for safe operation.
- ✓ The fire pit control system itself must be safe to use. Heat outputs are carefully measured and checked to enforce reliable heat performance
- ✓ To maintain certification regular in-house testing must be conducted to ensure fire pits maintain approved certification requirements
- ✓ Our factories are visited regularly by 3rd Party Inspectors to ensure that there are no substitutions to approved critical parts and to check our operating procedures and systems.
